

# SmartShop Portal

An Angular e-commerce application demonstrating routing, API integration, RxJS, and modern Angular features.

## Features

- **Authentication** - Login with DummyJSON API
- **Products** - Browse products with grid layout
- **Product Details** - View product images, ratings, and descriptions
- **User Profile** - View logged-in user information
- **Route Protection** - AuthGuard for protected routes
- **RxJS** - BehaviorSubject, tap, map, and catchError operators
- **Signals** - Modern Angular reactive state management

## Prerequisites

- Node.js (v18 or later)
- npm (v9 or later)

## Installation

1. Clone or download the project
2. Install dependencies

**npm install**

## Running the Application

Development Server

**ng serve**

Navigate to `http://localhost:4200`

## Login Credentials

Use these demo credentials to log in:

- **Username:** `'emilys'`
- **Password:** `'emilypass'`

## Project Structure

src/app/

|                    |                               |
|--------------------|-------------------------------|
| — login/           | # Login component             |
| — dashboard/       | # Dashboard with navigation   |
| — products/        | # Products listing (Signals)  |
| — product-details/ | # Product details (Signals)   |
| — profile/         | # User profile                |
| — header/          | # Header with user salutation |
| — services/        | # AuthService, ProductService |
| — guards/          | # AuthGuard                   |
| — models/          | # TypeScript interfaces       |

## API Endpoints

- Login: `'POST https://dummyjson.com/auth/login'`
- Products: `'GET https://dummyjson.com/products'`
- Product by ID: `'GET https://dummyjson.com/products/:id'`
